an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Frank Werner

Message from the Editor-in-Chief

Algorithms are the core of computational mathematics and computer science. The whole area has been considered from different perspectives, which has led to the development of several sub-communities. The aim is to bring together researchers and practitioners from different areas of computational mathematics and computer science and to offer a platform for interdisciplinary applications in different areas of science and technology. In this way, *Algorithms* may become a forum for the exchange of new stimulating ideas between the different sub-communities working in the area of algorithms and their applications and the presentation of high-quality novel algorithmic approaches.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Coverage by Leading Indexing Services** El Compendex / Engineering Village (Elsevier), Scopus (Elsevier), MathSciNet (American Mathematical Society)
-  **High Visibility** Emerging Sources Citation Index (ESCI-Web of Science)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)

Aims and Scope

Algorithms (ISSN 1999-4893) is an international journal, which provides an advanced forum for studies related to algorithms and their applications.

The scope of *Algorithms* includes:

- Theory of algorithms
- Numerical analysis
- Combinatorial optimization, operations research, discrete mathematics, and graph theory
- Distributed and parallel algorithms
- Approximation and online algorithms
- Randomized and quantum algorithms
- Performance of algorithms and algorithm engineering
- Interdisciplinary applications in other areas of mathematics and computer science
- Algorithms in biology, chemistry, physics, and language processing
- Algorithmic game theory and mechanism design
- Image processing with applications
- Machine learning
